## Your buried pipelines and cables are one of your largest assets. *They need protection.*

The Common Ground Alliance (CGA) Damage Information Reporting Tool (DIRT) estimates that over 42% of facility hits and near-misses are a result of the digging party not calling for a locate.

How can you make sure your "call before you dig" message gets across? By creating an effective damage prevention system. Use the Rhino TriView to provide the crucial foundation of your marking system.

## Visible

The Rhino TriView's patented triangular design ensures that your warning message will be visible from any angle.

## Versatile

- Use in new installations to create a highly visible marking system
- Slip the Rhino TriView over low visibility posts for an instant visibility upgrade
- Installation is easy in any soil type
- Multiple colors and cap colors help you code your marking system

*Use the Rhino TriView to solve your unique marking needs:*

- The TriView Test Station provides cathodic protection
- The TriView TracerPed™ enables quick hookup to tracer wires
- Mark a hydrant or pedestal using the TriView to enhance visibility to 360°
- Automatically increase your sign's visibility by using the TriView to mount signs

## Vital

The Rhino TriView Marking System protects your underground assets which are vital to your company's bottom line.

Patent # 6099203, Patent # 7,025,016, Patent # D525721

## Flexibility

The unique shape and material of the Rhino TriView allows it to bend and rebound when struck by a vehicle up to 55 MPH.

## Durability

The Rhino TriView will withstand repeated hits and still effectively mark your pipeline or cable line.

## Weatherproof

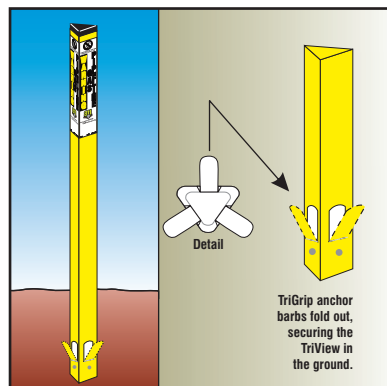

The Rhino TriView resists fading, and is temperature stable from -40° to +150° Fahrenheit.

## Direct Bury System

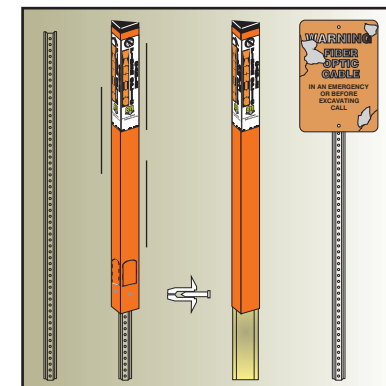

The Rhino TriView can be directly buried in the ground, eliminating the need for a u-channel post.

The patented TriGrip anchors lock the TriView into the ground.

## Soil Anchor System

Simply drive the TriView Soil Anchor into the ground with our TriView Flex Soil Anchor Driver. The TriView Flex slides into the anchor and locks in place.

## Retrofitting U-Channel & Fiberglass Posts

The TriView instantly converts old u-channel posts into high visibility markers.

The TriView 400 slides over faded fiberglass posts to provide 360° visibility.

## Protect Your Facilities from the Ground Up

Rhino Marking & Protection Systems provides innovative damage prevention systems to protect buried pipelines and cables.

With products ranging from soil and pavement markers to the patented TriView™ Marking System, Rhino can help you design a highly visible marking system.
